ABOUT ME

Full Stack Python Developer and UI/UX Designer, worked on cross-platform mobile apps, and automation scripts. Experienced in engineering clean, user-centric products and creating AI-assisted workflows for rapid end-to-end deployment.

SKILLS

Core	Experienced at
Python, Django, CSS, HTML, Flask, JavaScript, Figma, Framer Prompt Engineering Expert	Flutter, React Native, Kivy, Tkinter, Git/Github, REST APIs

EDUCATION

Higher Secondary School Certificate (Intermediate)	In Progress / Current Student
• Private Candidate	
Secondary School Certificate (Matriculation)	
• Completed Matriculation with Science subjects.	

EXPERIENCE

Freelance Software Developer Self-Employed	Jan 2024 — Present
• Architect and deliver custom cross-platform mobile and web applications utilizing Django, Flask, and React Native. • Manage end-to-end project lifecycles, client requirements, and deployment milestones under strict timelines. • Rapidly integrate unfamiliar frameworks and technologies based on specific client project specifications.	
Full Stack Python Engineer Yoma org	Nov 2025 — Apr 2026
• Developed and maintained full-stack web solutions as part of a distributed, US-based engineering team. • Engineered complex Python automation scripts to optimize internal data pipelines and reduce manual workflows.	
Software Engineer Intern IT Vision Solutions	Nov 2023 — Jan 2024
• Built mobile application frontends using Kivy and React Native for cross-platform deployment. • Programmed lightweight graphical user interfaces (GUIs) for Windows desktop applications using Tkinter. • Identified, debugged, and resolved runtime stability issues within active staging environments.	

PROJECTS

ShareBeam	Flutter, Dart, Rust
• An open-source, high-performance cross-platform local file-sharing application with a minimalist user interface.	
Ciro	Python, Django, Flutter, Dart
• A real-time crisis and weather monitoring mobile app powered by an asynchronous multi-agent AI workflow.	
BlockX	JavaScript, Chrome Extension
• A zero-lag Google Chrome extension enforcing safe search policies and content-filtering with minimal resource overhead.	
Proomo	Python, Django, HTML/CSS, JavaScript
• A marketplace platform for digital creators to manage, sync, and monetize promotional ad spaces.	
Luxe Perfume	Python, Django, Jinja, JavaScript
• A responsive e-commerce platform optimized for luxury fragrance distribution and seamless checkout.
